THE ANNUAL CATALOGUE

of Books, Pamphlets, &c. published during the year 1852 will be ready on the 12th inst.

47, Ludgate Hill: March 1, 1853.

AMONGST the immediately new books, or such as may be expected during the month, the following call for special mention:—Dr. Layard's "Discoveries in the Ruins of Nineveh and Babylon;" the "Narrative of the lamented Traveller, James Richardson, comprising the Details of his Mission into Central Africa, performed in 1851-52;" "The Third Series of the Castlereagh Correspondence;" Mrs. Stowe's "Key to Uncle Tom's Cabin;" a new and beautiful edition of Mr. Fortune's "Two Visits to the Tea Countries."

"The Life and Writings of William Paterson, of Dumfriesshire, founder of the Bank of England and of the Colony of Darien," is announced for publication, by Mr. S. Bannister, formerly Attorney-General of New South Wales.

Mr. Murray's "Handbook for England and Wales," is announced in 3 vols. post 8vo.

Fergusson's "Illustrated Handbook of Architecture," announced by Mr. Murray, will form an 8vo. volume, with 1000 illustrations on wood, and comprise a concise and popular account of the different styles prevailing in all ages and countries of the world, with a description of the most remarkable buildings.

The Photographic Society have commenced the publication of a Journal, the first number appearing this month. A new edition of the "Authorised Version of the Bible" has been undertaken, framed on the model of the "Chronological New Testament," issued in 1851. The Rev. James Robertson, Vicar of Bekebourne, near Canterbury, has in preparation a "History of the Christian Church," for the use of students and general readers: the first part will extend to the Reformation.

Two articles on the "English Press in the Nineteenth Century" appeared in the "Revue des Deux Mondes" for December and January last, being chiefly founded on Hunt's "Fourth Estate;" and are drawn up with considerable talent and knowledge of the subject. The writer is M. Cucheral-Clarigny; and he devotes his chief attention to the history and prodigious development of the "Times," which, he says, has an influence on public opinion in England exceeding that possessed in its own country by any other journal in the world.

"An Essay on the Character and Quality of Dickens's Writings," has recently been published by Dr. Julian Schmidt, of Leipzig; and is rendered more interesting by the comparison instituted by the writer between Dickens and some of the authors of Germany.

A Translation of Mr. Macaulay's Essays, &c. has appeared in German, at Brunswick, in 6 vols. The sixth volume contains the "Lays of Ancient Rome." A French Translation of Mr. Macaulay's "History of England," has just been published by Baron Peyronnet.

A Chevalier Meier has published a work, in German, in opposition to the Atomic Theory of Dalton. The German announcements strongly recommend the work to the notice of chemists, naturalists, &c.

In Heinrich's Quarterly Leipzig Catalogue, we observe no less than twelve different German translations of "Uncle Tom's Cabin," as published during the months of October, November, and December last; since which, we believe four or five others have appeared. In Russia, we have been credibly informed, such is the moral influence of the book, that cases are frequently occurring of the landholders bestowing freedom on the whole of their serfs, and that sympathy on their behalf is spreading throughout the empire.

THE POCKET PEERAGE AND BARONETAGE

For 1853.

Corrected to the 1st of February; with the recent Ministerial Changes.

By JOHN RUMSEY FORSTER, of "The Morning Post."

6s. cloth gilt.

"The third edition of this excellent guide to the Peerage of Great Britain and Ireland,—in which are combined the rare requisites of convenience of size, extent of information, and facility of reference, at a comparatively moderate price,—enables us to confirm the commendations we be-

stowed upon it on its first appearance. Mr. Forster has worthily achieved the task he has undertaken, and has fulfilled his promise of making the work the most complete and accurate in its way that has ever been offered to the public."—SUNDAY TIMES.

THE YEAR-BOOK OF FACTS IN SCIENCE AND ART—1853.

Edited by JOHN TIMBS. Fifteenth Year. With a Portrait of Dr. Lyon Playfair. 5s. cloth.

"This useful little annual is gradually assuming a greater value as the spread of science brings more and more facts within the grasp of the chronicler. Among the more remarkable of the 'facts' in the present volume are 'Ericsson's Caloric Ship,' 'The Australian Boomerang Propeller,' 'Faraday's Experimental Researches in Elec-

tricity,' and 'The Stereoscope.' On all these the reader will find well-selected notices. The work is indispensable to those who wish to preserve a register of the progress of art and science. It is a good book for Mechanics' and Literary Institutes, as well as general readers."

**UNIVERSAL HISTORY on SCRIP-
TURAL PRINCIPLES.** In 6 Volumes, fep.
8vo. 31s. 6d.—Just completed.

This work, which is peculiarly suited for family reading and school use, contains an exact recital, popularly treated, of the multifarious events of Universal History to the times of the Reformation. Throughout the work, while the most interesting circumstances in the history of men and nations have been faithfully displayed for the instruction and entertainment of the reader, the author has endeavoured to assist the student's judgment by carefully bringing Scriptural principles of action into comparison with the recorded events of History.
